Dear Mr. Shafer,

I could only get one page to print unfortunately and I copied the requirements on the back sheet.

Sorry but this will have to do. At least you have my signature!

And no, we don't have 2 quarters to rub together!

Sincerely

Dan J. H. MBA

<< WLAN report >>

* Connection : Failed (Error : TS-02)

* Connection Failed.

*** Solution ***

The WLAN access point/router cannot be detected.

1. Check the following 4 points.

- Make sure that the WLAN access point/router is powered on.
- Move your machine to an obstruction-free area, or closer to the WLAN access point/router.
- Temporarily place your machine within about one meter (3.3 ft.) from the WLAN access point when you are configuring the WLAN settings.
- If your WLAN access point/router is using MAC address filtering, confirm the MAC address of the Brother machine is allowed in the filter.

2. If you manually entered the SSID and security information(SSID/authentication method/encryption method/Network Key) the information may be incorrect.

Reconfirm the SSID and security information and reenter the correct information as necessary.

- How to confirm wireless security information(SSID/authentication method/encryption method/Network Key)

- 1) The Default security settings may be provided on a label attached to the WLAN access point/router. Or the manufacturer's name or model no. of the WLAN access point/router may be used as the default security settings.
- 2) See the documentation provided with your WLAN access point/router for information on how to find the security settings.

* If WLAN access point/router is set to not broadcast the SSID, the SSID will not automatically be detected. You will have to manually enter the SSID name.

* The Network key may also be described as the Password, Security Key or Encryption Key.

If you do not know the SSID and wireless security settings of your WLAN access point/router or how to change the configuration, see the documentation provided with your WLAN access point/router, ask the manufacturer of your access point/router or ask to your Internet provider or network administrator.

<Configuration>

Network Name (SSID)	NETGEAR26
Hardware Address (MAC)	c0:38:96:66:0e:fd
Communication Mode	Infrastructure
Authentication Type	WPA/WPA2-PSK
Encryption	AES
Network Channel	-
